

Life Cycle of a Penguin Zigzag Booklet

To make your zigzag book, cut along the outline of the book. Starting at the penguin on the left side, fold along each vertical dotted fold line. Gather your book together, making sure that the penguin illustration can be fully seen on the outside of the closed book.

To make your zigzag book, cut along the outline of the book. Starting at the penguin on the left side, fold along each vertical dotted fold line. Gather your book together, making sure that the penguin illustration can be fully seen on the outside of the closed book. Then, cut out the four steps and stick them in the correct order on to the blank spaces in the zigzag book (from the first part of the process on the left to the last part on the right).
